

## Changing the Microsoft Internet Explorer (IE) Browser Document Mode

The EDF System is best viewed when using the latest version of Microsoft Internet Explorer (IE 9.0) or higher. If your computer monitor is displaying irregularities, then you'll need to change your browser settings. Please follow these instructions.

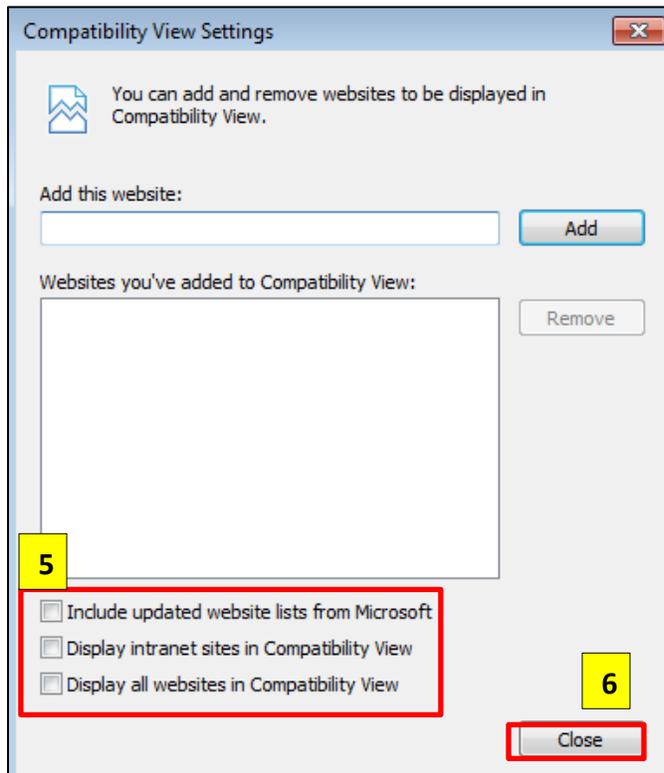

1. At the top of your browser click the right button on your mouse and it will display the browser popup menu.
2. Click the Menu Bar (be sure it is checked)
3. And the menu bar will appear in your browser window

4. Click the Tools Button for the Tools Menu to appear and select Compatibility View Settings

5. Inside the Compatibility View Settings be sure all three items are not checked
6. Click the Close Button and this will correct the Document Mode Settings for IE 9.0

If you're still experiencing issues with your computer display at work, then please contact your IT Department.
